old world flooring

Installation Guide for Multi-Width and Random Length Plank Flooring

Patina Old World Flooring produces two random width plank floor styles, Pegged Plank and Plain or non-Pegged Plank. There are two options of both these styles available; 3", 5", 7" or 4" 6" 8" wide planks as shown below in figure 1 and figure 2. In many old homes the planks that were layed were cut in the forest nearby, and utilizing as much of the wood as possible the patterns were layed in a random manner, rather than in the repetitive 3", 5" 7" or 4", 6", 8" pattern as shown below in figure 3 and figure 4.

To reproduce the look of old world flooring, we manufacture our flooring to be installed random, as shown in figure 1 and figure 2, there are more linear feet of the narrow width than the wide width boards.
